HAVE BEEN EXPOSED

Have you been exposed to someone who has been diagnosed with or tested positive for CV-19?

YES

Close contact?
Spent at least 15 minutes within 6 feet not wearing a mask (either person) with someone who is positive or symptomatic?

YES

Wear your mask!
Practice physical distancing!
Practice good hygiene!
Continue to monitor your symptoms daily and report any new developments.

NO

NO

HAVE SYMPTOMS
(I have NOT been tested)

1. Quarantine in place. Remain in your room and avoid contact with others. Wear your mask. Practice physical distancing and good hygiene!
2. Report your symptoms to the CV19 Support Program:
3. You will receive a call from a case manager with further instructions on testing and isolation if necessary.
4. Should you test with a positive result, go to the next decision tree.

1. Please do not panic or rush out to be tested. It takes 2-5 days after a possible exposure for a CV19 test to display accurate results.
2. Report your exposure to the CV19 Support Program.
3. Self-quarantine in place. Be considerate of others you may come in contact with, monitor your symptoms, and stand-by to receive instructions from a case manager.
4. Wear your mask. Practice physical distancing and good hygiene!
5. If you begin to experience symptoms or test with a positive result, go to the next decision tree.

TESTED POSITIVE
(Symptomatic and Asymptomatic)

Where did you test?

Tested On-Campus (Student Health Center)

1. If you can reasonably and safely travel home (close and no family risks), go home and isolate for at least 10 days, and until you are cleared to return to campus.
2. Isolate in place. Remain in your room and avoid contact with others.
3. SHC automatically reports your positive result and a case manager will follow-up shortly. You do not need to report your results to the CV19 Support Program.
4. You will receive a call from a case manager with further instructions on isolation.
5. Report your positive result to a House Director or designated chapter representative. Notify anyone you may have come in close contact with over the past 4 days.

Tested Off-Campus (Non-UA Entity)

1. If you can reasonably and safely travel home (close and no family risks), go home and isolate for at least 10 days, and until you are cleared to return to campus.
2. Isolate in place. Remain in your room and avoid contact with others.
3. Since you tested off-campus, you must report your positive result to the CV19 Support Program.
4. You will receive a call from a case manager with further instructions.
5. Report your positive result to a House Director or designated chapter representative. Notify anyone you may have come in close contact with over the past 4 days.

HAVE BEEN EXPOSED

If you have not been contacted by a case manager within 2 hours of:
Receiving a positive result from an on-campus facility
or
Reporting a positive, off-campus result to the CV19 Support Program
Please email Julie Elmore at juliellemore@ua.edu

If you test positive and have not been contacted by a case manager within 2 hours of:
Remain in your room and avoid contact with others.
Continue to monitor your symptoms daily.
Isolate in place.

As of August 27, 2020, these protocols apply to all individuals, including those who may be asymptomatic and/or individuals verified to have the antibodies for CV19.
